Recommended tools (not included)

- 1/8" Drill bit
- Power drill
- Pencil
- Level

Parts and Hardware (included)

- Backplate
- x2 wood screws
- Set screw
- Knocker cover
- x1 hex key
- Knocker

1. Using the hex key, unscrew the set screw to remove the knocker and knocker cover.

2. Drill pilot holes at each marked location, making sure not to drill through the door.
   - Tip: Mark the drill bit with a marker or tape at about 1" from its end, then use the mark as a guide to make sure you don’t drill through the door.

3. Mount the square door knocker and cover to the backplate.

   Secure with the small set screw and hex key.
